

TITLE OF INVENTION

Fluoropolymer Yarn Blends

ABSTRACT OF THE DISCLOSURE

5 The present invention relates to yarn blends of fluoropolymer yarn
and yarn of polyester, polyamide, or acrylic fiber, the latter when dyed
providing color to the yarn blend even with the fluoropolymer yarn being
undyed. When the polyester, polyamide, or acrylic fiber yarn is stronger
than the fluoropolymer yarn, the yarn of such fiber strengthens the yarn
blend.
